

Creationists View

1. What do Evolutionists and Creationists agree on?

Adaptation and Speciation (1)

2. **Un-Believers Belief - How could all of the animals couldn't have fit on the Ark?**

The answer: The number of kinds on the Ark were much fewer than the number of species that exist today.

_____ adaptation and speciation played a big role in all the species we see today. **Rapid (1)**

3. What do Creationists believe about the original genomes?

They were originally created perfect and have been in decline since rejection of God by Adam and Eve (2)

4. Describe your reaction to the comparison of the evolutionary tree/web of life and orchard of life. (2)

5. Organisms around the world have _____ functions and features. **complex (3)**

6. What continues to build up in our genome and what will the impact be of this?

Mutations - they will eventually create major issues for the human race. (4)

7. **How is incest explained?**

Incest originally didn't have any genetic impacts since the genomes were nearly pure. Eventually as mutations build up, incest was dangerous and was then prohibited by God.

8. **Un-Believers Question -Why is there disease, disorders and deformity if God is good?**

These were not God's intention, but a result of our sin against God and a fallen world. God no longer sustains a perfect world.

9. The Evolution and Creation debate should focus on the creation of new genetic _____. **information**

10. As God graciously provided Thomas the physical evidence of seeing Jesus' _____ in his time of doubt so does he now graciously provide the physical evidence of seeing his _____ in the world's time of doubt. **wounds, programming**

11. Read Psalm 14:1 - The _____ does not believe in God. **fool**
