

The Cell

1. The original view of the cell was that it was a _____ lump. **simple (1)**
2. All life is _____. **complex (2)**
3. How would you describe the cell as we know it today? Is this different from what you believed previously?

Very complex filled with information and complex molecular machines (2)

4. Were you aware of molecular machines? What are your first impressions of these machines?

5. How does Romans 1:19-20 apply?

God, especially in this day and age, has revealed great details of His creation that points to Him. Because of this, no person has an excuse to deny Him. (2)

6. Do you think irreducible complexity is a valid concept as it relates to biology? Why or why not?
